Chemical & Industrial products Sector :

The sector of chemical & industrial products sales the following:

- Fertilizer anticaking and wax emulsions.
- Concrete accelerators.
- Paraffin oils and Lubricants.
- Industrial products.

For the production and sales of chemical & industrial products, Technochimiki Ltd has an exclusive cooperation with the following specialised companies:

• ARCH TIMBER	Great Britain	Wood preservatives
• AL NASR FOR COKE & CHEMICALS	Egypt	Metallurgical coke–Ammonium nitrate
• PETRONAS	Italy	Insulating and mineral oils
• KREMPEL	Germany	Electrical insulation papers and related products
• TORGGLER	Italy	Building and concrete chemicals

Chemical & industrial products sector's director is Mr D. Lymperopoulos, Chemical Engineer.

Mining & Construction Equipment Sector :

The sector of mining and construction equipment includes the sales of following machinery equipment:

- Underground excavation and tunnelling machines.
- Drilling machinery equipment
- Shotcrete machines and accessories
- Blasting equipment
- Loading and hauling equipment
- Support and foundation equipment
- Auxiliary works equipment

For the production and sales of Equipment for mines, quarries and geotechnical works, Technochimiki Ltd has an exclusive cooperation with the following specialised companies:

• ABC MANUFACTURES	Canada	Mine and tunnelling ventilation
• RAILTECH	France	Bolting and rail equipment
• BOART LONGYEAR	Europe	Drilling equipment
• GHH FAHRZEUGE	Germany	Loaders & trucks for mining & tunnelling
• NORMET	Finland	Underground, mining & tunnelling vehicles
• SCHRAMM	U.S.A	Drilling rigs for water, exploration & mining
• SOILMEC	Italy	Drilling machines for foundation
• TREAD CORP.	U.S.A	Emulsion plants
• MINOVA	France	Drilling material
• DATC	France	Drilling material

Director of the mining and construction equipment sector is Mr K. Mitsotakis, Mining Engineer.

Construction Works :

Technochimiki Ltd is today active in the construction of underground works, tunnelling and excavation works under the most difficult and demanding conditions.

Type of Technochimiki's works:

- Contracting of total construction works
- Subcontracting special works with their own machinery and personnel with unit prices for the works
- Rental of machinery for construction of special works ie support, shotcrete, core drilling, etc.

Our main today works are:

- Mining tunnels in Silver + Baryte Ores Mining co
- Production of Nickel ore in Larco SA.
- Dam construction for the Ministry of Agriculture.

Director of the construction works is Mr. P. Mavridis, Mining Engineer.

Technical Service Sector :

For the service to the clients, Technochimiki Ltd has a Technical sector including the following:

- Warehouse with spare parts stock, consumables and other products.
- Dept for training, quantitative & quality inspection of goods.
- Workshop for service, repair and over hauling of machines and equipment
- Distribution network for parts, products, consumables, etc.

Technical service sector is responsible for the inspection, before delivery to the clients, of all material and products distributed, to secure the correct quality and quantity in accordance with the specifications of the product, on time delivery and proper transport, to save time and to minimize losses of the valuable products distributed.

After delivery, the Service Dept follows the efficiency and the quality of the equipment and products in order to act, if necessary, for the service to the clients. The repairs, replacements or regulations are the most frequent activities taken by the After-Sales Dept to secure the life time care of the products.

Director of Technical service is Mr Nikitas Giannakopoulos with the assistance of Mrs Iro Mitsotaki, Electrical Engineer.

Production Sector :

Technochimiki's production Dept is equipped for machining, heating, blending and packing of products which are delivered to the industry, mines, technical works, refineries, metallurgy, etc.

The production plant is based in Aspropyrgos, Attica.

Production Department, who delivers most of the chemical products of the company, is supervised by Mr. G. Livanis, Chemist.
